

# CIWv5 Foundations

## Software Spreadsheet (May 2005 Release)

### Internet Business Foundations (version 1.1)

#### Software Requirements

During development of this course, Adobe Systems Inc. acquired Macromedia Inc., the owner of several software applications discussed and demonstrated in this course. Issues such as product name changes were not finalized when this course went to print. Therefore, some course narrative, labs, figures and URLs still refer to these applications as products of Macromedia. These references will be updated in future releases of CIW courseware, after information becomes available from Adobe. At this time, you should not experience any delivery problems with this courseware due to the Adobe acquisition of Macromedia.

Internet Business Foundations v1.1 (CIW v5) Software	Purchase	Pricing Information Note: All software must be properly licensed before classroom implementation.
